SUMMARY

Senior Software Engineer with 10+ years of experience delivering full-stack products, cloud-enabled platforms, and automation in enterprise and SMB contexts.

- Hands-on delivery across architecture, implementation, CI/CD, and operations.
- Technical leadership for platform initiatives serving high-volume concurrent usage.
- Strong outcomes in systems integration, BI enablement, and operational efficiency.

EXPERIENCE

Senior Software Developer Engineer

WEX Inc

Apr 2021 - Present

WEX is a leading U.S. corporate payments and mobility fintech company. I primarily work on backend systems for authorization, reporting, and data analysis, while also supporting selected UI flows and developing systems/scripts in C/C++, Python, Java, and Bash.

- Delivered a real-time transaction reporting and integration capability by building a push service that streams live carrier, partner, and merchant transactions to customers.
- Provide production support, including AWS Console and CloudWatch investigation for incidents and reliability monitoring.
- Drive lower-environment architecture and development work across application, DevOps, and deployment workflows.
- Execute database schema evolution, including index additions and SQL query optimization for performance.

Technologies Used:

AWS | Terraform | Python | C/C++ | Java | Shell | GitHub Actions | Docker | Kubernetes | CloudWatch | SQL Tuning | DB Indexing | Authorization Systems | Production Support

Full Stack Developer

Oi S/A

Feb 2018 - Apr 2021

Led development of a national-scale corporate web platform, supporting internal operations and roadmap expansion to customer-facing channels.

Achievements:

- Led end-to-end delivery of a national platform supporting 600+ concurrent users in distributed nationwide operations.
- Integrated key systems through APIs/microservices, reducing manual B2B handoffs by 35%.
- Built georeferencing module for access feasibility, cost, and timeline estimates.
- Delivered Python automations and Power BI dashboards that reduced reporting lead time by 40%.

Technologies Used:

Python | PHP (Legacy) | Laravel | jQuery (Legacy) | Node.js | HTML/SASS | MySQL | SQL Server | Power BI | Linux Server | Windows Server (Legacy)

Web Analyst and Developer

Falconi

Feb 2017 - Feb 2018

Developed and customized SharePoint solutions for management consulting engagements structured around PDCA practices.

Achievements:

- Standardized technical and functional documentation with a reusable Wiki model.
- Customized SharePoint for nationwide access and data update workflows.
- Supported operational governance and cost optimization for DNIT initiatives.
- Aligned SCRUM rituals to improve consistency and delivery cadence.

Technologies Used:

SharePoint | HTML/CSS | JavaScript | .Net

Systems Developer and Consultant

Freelancer

2014 - Current

Development of websites and systems for different segments such as medical clinics and schools. The work is carried out with the customer from the definition of current processes and the identification of problems to the solution proposal, development and implementation of the solution. All projects undergo various types of analysis such as risk analysis, impact, hardware components and available assets as well as database modeling, prototyping and survey and definition of requirements. These analyzes are performed before, during and after development, when applicable.

Achievements:

Systems development for schools, medical clinics and other segments. The oldest system has been running for 10 years and remained up to date in 2026, with the security and privacy of its users guaranteed and in compliance with the LGPD.

Technologies Used:

PHP (Legacy) | jQuery (Legacy) | HTML/CSS | Bootstrap | Node.js | Python | MySQL

Monitoring and Backup Analyst (Intern)

Servix

Jan 2015 - Jan 2016

The company operates in the IT infrastructure area, providing its customers with data storage and protection solutions, server consolidation and virtualization, security and 24/7 connectivity. The work carried out in the company was directed to data protection (backup) and, after several training sessions, the implementation of backup solutions in the customers' environments was carried out. Attendance calls were made to customers of the solution with support from the NETAPP and SYMANTEC team in the USA, as well as documentation and small training sessions.

Technologies Used:

SnapProtect (NETAPP) | Zabbix

Solutions Consultant (Intern)

Módulo

Jan 2014 - Jan 2015

The company operates in the IT area providing customers with risk governance and compliance solutions using the Risk Manager® software itself. Performance in the company involved several areas, including the development of internal and external systems using PHP, HTML5, CSS3, JavaScript and MySQL, assistance in the post and pre-sale operations of the software (answering calls, conducting training and presenting the tool to the client), translation of documents (English-Portuguese and Portuguese-English), training in the fields of knowledge of risks and conformities based on own software and following the GRC standard and compatible with ABNT NBR ISO 31000:2009 and related standards.

Technologies Used:

PHP | HTML | JavaScript | MySQL | MSSQL

SKILLS

Cloud & Operations

AWS (Console, CloudWatch)

Production Support & Incident Investigation

DevOps, CI/CD, GitHub Actions, Terraform

Backend, Data & Architecture

Python

API & Microservices Design

SQL Optimization (MySQL & SQL Server)

C/C++ and Java

Node.js and Docker

Leadership & Domain Expertise

DevOps | Object-oriented | GIT | Bash & Shell | Laravel | Scrum | Docker | AWS | Technical Leadership | Cross-team Collaboration | End-to-end Execution | Computer Forensics | LGPD / Compliance | Terraform | GitHub Actions | Kubernetes | Prototyping | Requirements Analysis | Data Modeling

EDUCATION

Computer Forensics and Digital Expertise ***(Lato sensu)***
IPOG
2016 - 2018

Systems Analysis and Development ***(Tecnólogo)***
CEUB
2014 - 2016

CERTIFICATIONS
